	Preface	V
	Authors	IV
Part I	Fundamentals	1
1.	Introduction	2
1.1	Aluminium characteristics	4
1.2	Aluminium applications	6
1.3	Aluminium alloys	7
1.3.1	System of aluminium alloys	7
1.3.2	Wrought aluminium alloys	8
1.3.3	Casting aluminium alloys	10
1.4	Trends in aluminium production	10
2.	Sources for the production of aluminium	14
2.1	Aluminium ore	14
2.2	Aluminium scrap	15
3.	Alumina refinery (Bayer Process)	15
3.1	Stockpiling of bauxite	15
3.2	Bauxite grinding	15
3.3	Digestion	16
3.4	Separation and filtration	17
3.5	Precipitation	17
3.6	Calcination	17
3.7	Red mud disposal	18
4.	Aluminium reduction	18
4.1	Hall Heroult process	18
4.2	Potlines	20
4.3	Casthouse	22
4.4	Carbon plant	23
5.	Secondary aluminium	24
5.1	General consideration	24
5.1.1	Quality aspects	25
5.1.2	Energy requirements	26
5.2	Scrap processing	31
5.2.1	Mechanical preparation	31
5.2.2	Primary inspection	31
5.2.3	Comminution	31
5.2.4	De-coating	33
5.3	Thermal processing	33
6.	Material basis for recycling	35
6.1	New scrap	36
6.2	Old scrap	36
Part II	Mechanical Preparation	41
1.	General	42
1.1	Principles of mechanical preparation	42
1.2	Principles plant requirements	42
2.	Material storage	43
3.	Cutting and baling	44
4.	Comminution	45
4.1	Crusher	45
4.1.1	Impact crusher.....	45
4.1.2	Shredder	46
4.1.3	Jaw crusher	47
4.2	Ball mills	48
5.	Classification	49
5.1	Vibrating screens	49
5.2	Screening drums	49

6.	Sorting	50
6.1	Picking belt conveyors	50
6.2	Magnetic separators	51
6.3	Eddy current separation	52
6.4	Air flow separation	53
6.5	Cyclone separator.....	53
6.6	Sink float separator	54
7.	Process lines for mechanical preparation	56
7.1	Shredder process line	56
7.2	Dross treatment	59
7.3	De-coating	63
7.3.1	Rotary drum de-coater.....	64
7.3.2	Fluid bed de-coater.....	67
7.4	Slag processing	70
7.5	Mechanical processing	71
Part III	Metallurgical Processing	73
1.	Melting process	74
1.1	Principle considerations	74
1.2	Oxidation during melting	75
1.3	Melting additives	79
1.3.1	Usage of salt in the rotary drum furnace	79
1.3.1.1	Application of salt	80
1.3.1.2	Protection of metal	81
1.3.1.3	Stripping of oxides and coagulation	83
1.3.1.4	Dissolving and suspension of other materials	86
1.3.1.5	Characteristics of salt	87
1.3.1.6	Characteristics of slag	89
1.3.1.7	Summary and recommendations	90
1.3.2	Usage of chemicals in the hearth furnace	91
1.3.2.1	Covering of melt	91
1.3.2.2	Refining	92
1.3.2.3	Grain refining	92
1.3.2.4	Wall cleaning	93
1.3.2.5	Treatment chemicals	94
1.4	Summary of process losses	94
1.4.1	Melt losses	94
1.5	Energy consumption	99
1.6	Alloying	101
2.	Overview of melting technologies	106
2.1	Classification of furnaces according to design characteristics and application	107
2.1.1	Basic requirements	107
2.1.2	Classification of furnaces	109
2.1.3	Design criteria and application of furnaces	114
2.1.3.1	Hearth furnace	116
2.1.3.2	Twin chamber furnace	136
2.1.3.3	Dry hearth furnace	148
2.1.3.4	Tower furnace	149
2.1.3.5	Rotary drum furnace	150
2.1.3.6	Crucible furnaces	160
2.1.3.7	Crucible induction furnaces	160
2.1.3.8	Channel induction furnaces	164
3.	Furnace technology	166
3.1	Energy balance and efficiency	166
3.1.1	Basics of thermodynamics	166
3.1.1.1	Energy	166
3.1.1.2	Enthalpy	167
3.1.1.3	Heat capacity	167
3.1.1.4	Heat flux	171
3.1.2	Heat Balance	174
3.1.3	Efficiencies	177
3.1.3.1	Combustion efficiency	178
3.1.3.2	Furnace efficiency	182
3.1.3.3	Total efficiency	182
3.1.4	Specific energy consumption	183
3.1.5	Introduction of heat	184

3.1.6	Fuels	186
3.1.7	Reaction of combustion	188
3.1.8	Combustion air requirements	190
3.1.9	Combustion products	192
3.1.10	Induction heating	198
3.1.11	Resistor-heating	200
3.2	Transmission of heat	202
3.2.1	Heat conduction.....	203
3.2.2	Convective heat transfer.....	209
3.2.3	Radiant heat transfer	211
3.2.4	Total heat transfer.....	219
3.3	Burner technology.....	223
3.3.1	Fuels.....	223
3.3.2	Burners	226
3.3.2.1	Gas burners.....	226
3.3.2.2	Oil and dual fuel burners.....	229
3.3.3	Combustion systems	230
3.3.3.1	Efficiency of combustion systems	230
3.3.4	Oxy-Fuel burner systems.....	233
3.3.5	Regenerative burner systems	233
3.3.5.1	System principle	233
3.3.5.2	Special Ultra LOW-NOX burners for regenerative systems.....	235
3.3.5.3	Regenerators.....	237
3.3.5.4	Maintenance of regenerative burner systems.....	239
3.3.6	Combustion system controls	241
3.3.6.1	Safety controls.....	241
3.3.6.2	Controls for gas/combustion air ratio	242
3.3.6.3	Controls for combustionsystem capacity.....	243
3.3.6.4	Controls for regenerative burner system.....	244
3.4	Energy losses	245
3.4.1	Metal discharge	245
3.4.2	Stack losses	246
3.4.2.1	Recuperators	247
3.4.2.2	Regenerators	253
3.4.2.3	Incinerators	256
3.4.2.4	Charge pre-heating	259
3.4.2.5	Tower furnace	262
3.4.3	Wall losses	263
3.4.4	Door losses	264
3.5	Furnace design	266
3.5.1	Mechanical structure, general	266
3.5.1.1	Hearth furnace	267
3.5.1.2	Twin chamber furnaces	276
3.5.1.3	Oval furnace	278
3.5.1.4	Rotary drum furnace	278
3.5.1.5	Induction furnace	287
3.5.1.6	Hydraulic equipment	290
3.5.1.7	Auxiliary equipment	294
3.5.2	Refractory lining	299
3.5.2.1	Requirements of refractory linings	299
3.5.2.2	Groups of refractory materials and their raw material	302
3.5.2.3	Raw materials	303
3.5.2.4	Types of refractory material and manufacture	303
3.5.2.5	Curing	308
3.5.2.6	Refractory design	310
3.5.2.7	Design and Installation	313
4.	Casting technologies	320
4.1	General consideration	320
4.1.1	Product mix	320
4.1.2	Quality requirements	320
4.1.3	Casting machines	321
4.2	Heat balance	322
4.2.1	Casting temperatures	322
4.2.2	Cooling conditions	323
4.3	Design of casting equipment	324
4.3.1	Casting circles	324
4.3.2	SOW Casting installation	325
4.3.3	Ingots casting machine	326
4.3.4	Ingots stackers	330
4.3.5	Vertical direct chill casting machine	332
4.3.6	Horizontal direct chill casting machine	335
4.3.7	Strip casting machine	336
4.3.8	Rod casting machine	338

4.3.9	Pelletizing table	338
4.4	Water treatment	339
5.	Metal treatment	340
5.1	De-gassing systems	340
5.2	Some basic considerations	342
5.3	Inline degassing units	344
5.4	Furnace-installed systems	346
5.5	Metal filtration	348
6.	Environment control	350
6.1	Design criteria	350
6.1.1	Gaseous emissions	350
6.1.1.1	Combustion products	351
6.1.1.2	Products of evaporation	351
6.1.1.3	Carbonisation products	352
6.1.1.4	PCDD / F	352
6.1.2	Clean gas requirements	353
6.1.3	Water	353
6.1.4	Noise	353
6.1.5	Production waste	354
6.2	Fume collection and health precaution	354
6.3	Waste gas treatment	354
6.3.1	Casting furnace	355
6.3.2	Melting furnace	355
6.3.3	Waste gas system	355
6.3.4	Additives	361
6.3.5	Cloth filter	364
6.3.6	Wet scrubber	369
6.3.7	Centrifugal separator (cyclone)	371
6.3.8	Quenching chamber and incinerator	374
7.	Process control	376
7.1	Sensors and actuators	378
7.1.1	Sensors	378
7.1.2	Actuators	382
7.2	Control architecture level 1	382
7.2.1	Interlockings	382
7.2.2	Automatic control loops	383
7.2.2.1	Temperature control	386
7.2.2.2	Fuel radio control	390
7.2.2.3	Burner safety	390
7.2.2.4	Motion control	390
7.2.3	Control hardware	391
7.3	Control architecture level 2	392
7.3.1	Process optimization	393
7.3.2	Melting optimization	394
8.	Quality assurance	395
8.1	Quality management	395
8.2	Incoming material	396
8.2.1	Incoming scrap	396
8.2.2	Additives	397
8.2.3	Products	397
8.3	Testing methods	398
8.3.1	Metal analysis	398
8.3.2	Hydrogen content	400
8.3.3	Non-metallic inclusions	400
8.3.4	Non-metallic inclusions	402
9.	Safety	402
9.1	General safety aspects	402
9.2	Personal safety	402
9.3	General plant safety	403
9.3.1	Electrical equipment	404
9.3.2	Occupational disease prevention	405
9.3.3	Fire protection	406
9.3.4	First aid	407
9.3.5	Furnaces	407
9.3.6	Charging	411
9.3.7	Liquid metal handling	411
9.3.8	Equipment	411

Part IV	Plant Design	413
1.	Plant design	414
1.1	Equipment arrangement	414
1.2	Plant layout	418
1.3	Plant personnel	421
2.	Plant implementation	423
2.1	Feasibility and basic engineering	423
2.2	Feasibility study	426
2.2.1	Basic data.....	426
2.2.2	Plant organization.....	426
2.2.3	Land	428
2.2.4	Buildings	428
2.2.5	Fuel and electric energy	428
2.2.6	Raw material.....	428
2.2.7	Metal Prices.....	429
2.2.8	Maintenance	429
2.2.9	Marketing Cost	429
2.2.10	Summary	430
2.3	Calculations	430
2.3.1	Total Investment	430
2.3.2	Floating assets	431
2.3.3	Start-up cost	431
2.3.4	Miscellaneous.....	431
2.3.5	Calculation rate of return	431
2.3.6	Description of the calculation model	431
2.3.7	Net present value.....	432
2.3.8	Internal rate of return method	432
2.3.9	Payback method.....	432
2.3.10	Conclusion.....	433
3.	Detail engineering	433
4.	Construction	434
5.	Project management	435
6.	Final remarks	437
	Appendix	
	Literature	439
	Index.....	443
	Advertiser's index	453
